## DETAILED ACTION

### EXAMINER'S AMENDMENT

1. Authorization for this examiner's amendment was given in a telephone interview with Mr. Grubert (Reg. 59,143) on 06/14/2010.

2. The application has been amended as follows:

In claim 16, line 7, after "wherein the system is" please delete [**operable**] and insert – **configured to perform** --.

End of amendment.

### Allowable Subject Matter

3. Claims 10-18 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The invention is directed to a speaker-dependent speech recognition method and system which if a voice utterance could not be recognized, assign the utterance to a new command.

Claim 1 recites, inter alia, following limitations:

d) recording another voice utterance and generating a second voice pattern;  
e) comparing said second voice pattern with said first voice pattern; and  
f) if the comparison shows a predefined degree of similarity then combining the  
first and second voice pattern and assigning a new command to the combined voice  
pattern and storing the combined voice pattern in said database, and otherwise  
repeating steps d) to f).

Gammel (US Pat. 5,832,429) discloses a method of enrolling a name/address for voice speed dial using a speech recognition system. Gammel discloses a user could use voice to call a person by speaking the person's name. Gammel also discloses the user could use voice to enroll a new name by adding, deleting or modifying a "name to call" list. The user could train the speech recognition system to recognize the new name. Gammel fails to compare the new recording name utterance with the unrecognized name utterance (first voice pattern) and combine two utterances if they are similar. Gammel fails to disclose above underlined limitations.

Hon et al. (US Pat. 5,852,801) discloses a method of adding unrecognized words into the vocabulary of a speech recognition system. Hon discloses for an unrecognized word, determining if it is in the lexicon and based on the determination to add or modify the lexicon so that the system could recognize this unrecognized word in the future. Hon does not compare the new recording utterance with an unrecognized utterance (first

Art Unit: 2626

voice pattern) and combine two utterances if they are similar. Therefore, Hon fails to disclose above underlined limitations.

Everhart et al. (US Pat. 6,587,824) discloses adapting in-vehicle speech recognition system for new speaker's voice characteristics so that misrecognized voice commands could be corrected. Everhart does not compare the new recording voice command with an unrecognized voice command and combine two voice commands if they are similar, therefore, Everhart fails to discloses above underlined limitations.

Prior art of record, either alone or in combination, does not teach or suggest above underlined limitations in combination with other recited limitations, therefore, fails to anticipate or render obvious the claimed invention.

Claim 16 includes features similar to claim 1. Dependent claims 11-15 and 17-18 further limit their corresponding independent claims. Therefore, for a similar reasons stated above, claims 11-18 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
